MEDICAL

An Introduction to **Stericut®**

When you consider the cost of a surgical procedure and the importance of a “quality cut” to the bone, the decision to purchase a high-quality blade is in itself a cost saving.

Stericut® single-use saw blades, burs and drills are all manufactured by De Soutter Medical in the UK, at Tewkesbury, Gloucestershire. Our purpose-built factory has modern, state-of-the-art machinery installed to manufacture to the highest quality and provide sterile power tool consumables at competitive price levels.

Blades are manufactured using the latest CNC laser cutting and grinding machines. De Soutter Medical has over 65 years’ experience in the manufacture of powered instruments and its associated equipment giving our customers total confidence in the quality of our products.

Value Through Quality

When you consider the cost of a surgical procedure and the importance of a “quality cut” to the bone, the decision to purchase a high-quality blade is in itself a cost saving. For instance, poorly cut bone where a low quality blade inflicts

thermal necrosis, may be very costly in the long-term, leading to revisions. Also, some surgeons may identify that the blade is not cutting as it should and use two blades where one quality blade would suffice. De Soutter Medical therefore concentrates on a high-quality product which produces an optimum cutting edge to ensure a perfect cut even on the hardest of bone.

Service

De Soutter Medical currently has direct offices in the UK, Austria, Australia, Belgium, France, Germany, Italy, the Netherlands and U.S.A., as well as a comprehensive international distribution network across the rest of the world. In addition, we design and manufacture blades to customer specification whether that be an individual surgeon or companies such as implant manufacturers who require a specific blade design.

Our highly trained regional managers are always happy to come and see you to answer any questions you have and ensure you find the right product. We can provide you with samples to trial, if you are unsure of exactly what you need. Furthermore, our friendly and efficient customer service team are available to answer any questions about

De Soutter Medical products, both before and after their purchase, offering continuity of service throughout. Our customer service team is trained to troubleshoot and support customers on-site as required.

We understand the importance of on-time deliveries as most hospitals use a “just-in-time” approach to their consumable purchasing. Our standard delivery is next day for orders placed prior to 2 p.m., delivered before 5 p.m. the following day. Special deliveries are available for urgent orders, including same-day deliveries, and can be quoted as required.

Range

De Soutter Medical manufacture all of the blades for our wide range of power instruments, and in addition, we manufacture blades that are compatible with all other major power instrument manufacturers. As a specialist service we can, create a drawing from your specification for authorisation before taking to manufacture.

Blade Features

De Soutter Medical offer a comprehensive range of fully compatible saw blades for all current power tool systems.

These compatible blades are functionally equivalent both dimensionally and materially to the branded product that they've been designed to replace.

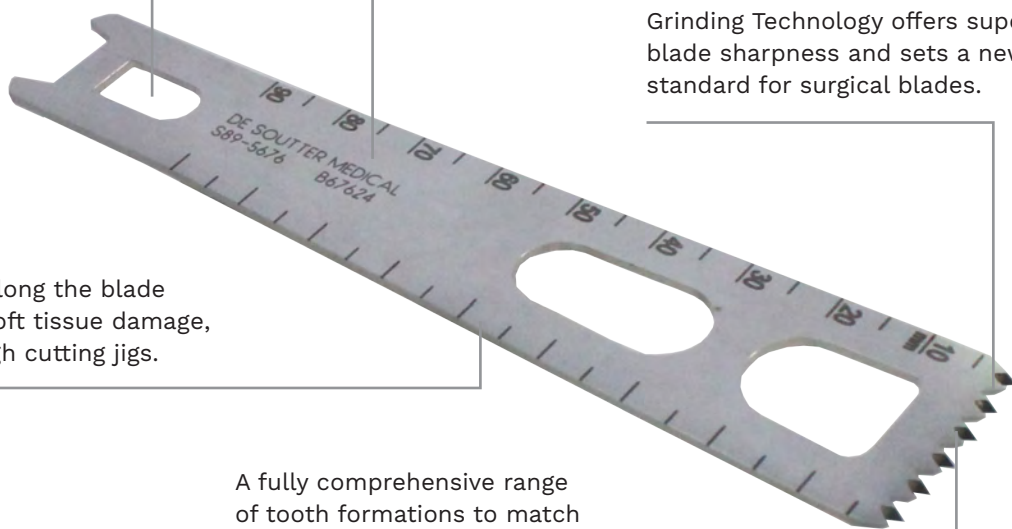

Compatibility with all current power tool systems on the market – around 50 hub options available.

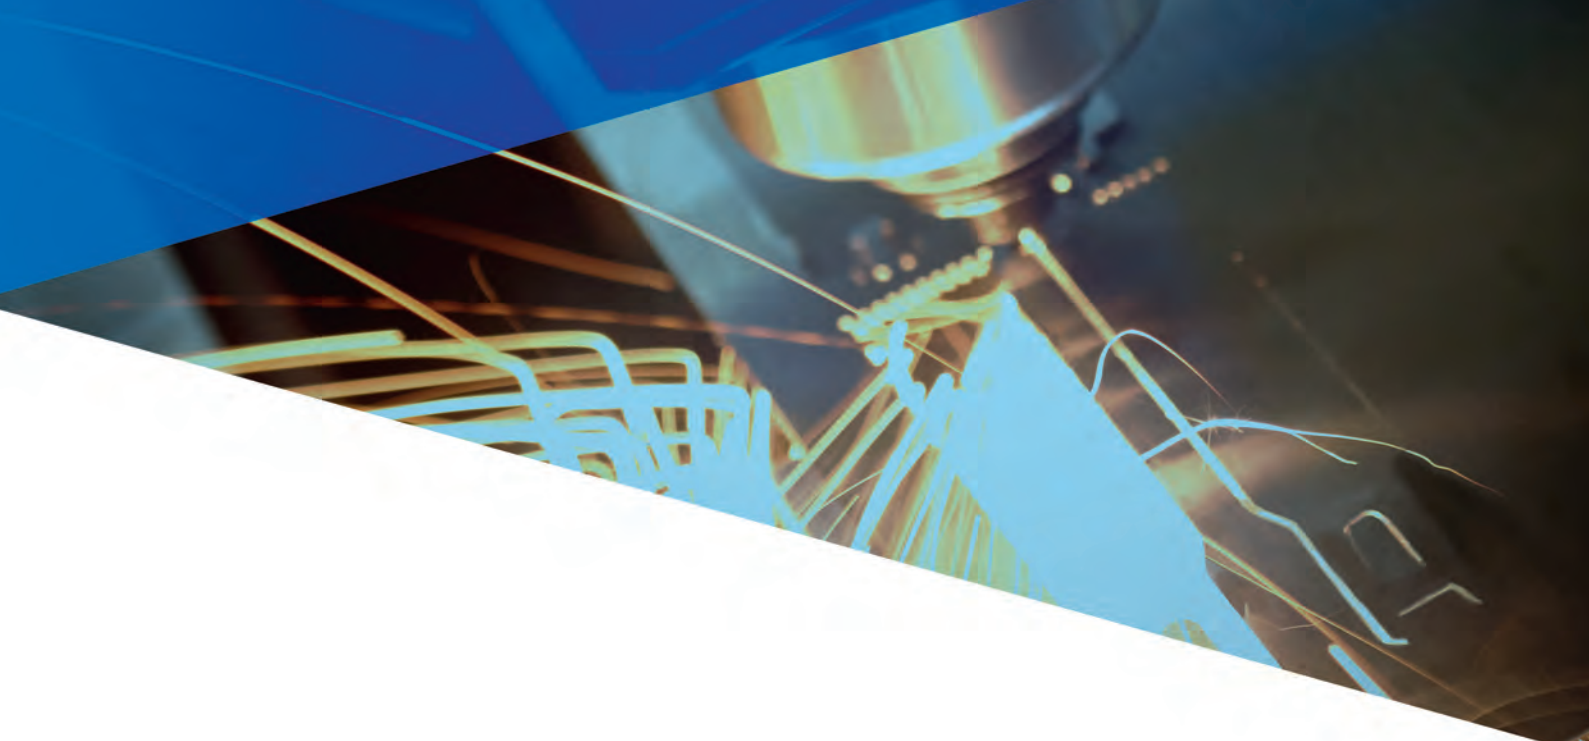

Highest-grade surgical stainless steel is used. Consistent blade thickness increases overall cut accuracy due to a precise fit in the cutting jig.

De Soutter Medical's Precision Grinding Technology offers superior blade sharpness and sets a new standard for surgical blades.

Filleted edges along the blade length reduce soft tissue damage, and wear through cutting jigs.

A fully comprehensive range of tooth formations to match every possible procedure type.

Quality Control

Our Stericut® range of products are supplied sterile double pouched, ready for operating theatre use. Our world-class clean room facility in the UK exceeds the requirements for BS EN ISO 14644-1 and ensures total confidence in the quality of product leaving our facility. We have regular microbiological sampling to monitor the performance of our contamination control systems.

The company is accredited to ISO 13485 quality standards and all our products and systems comply with the European Medical Devices Directive (93/42/EEC). All Stericut® products are recommended only for single-use and are suitably marked to ensure traceability.

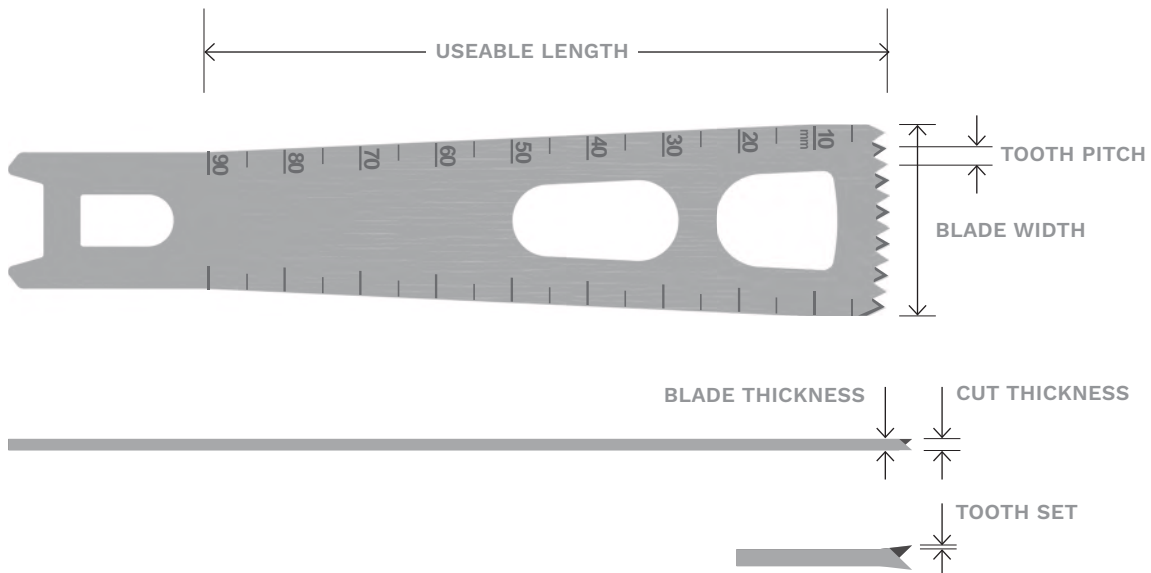

Whilst De Soutter Medical clearly

recognise the importance of a technologically advanced product, we also believe that any product is only as good as the service which supports it. It is for this reason that we strive to provide high-quality customer service. Our goal is total customer satisfaction.

Glossary

Sagittal & Oscillating Blades

USEABLE LENGTH

The maximum depth of cut possible.

BLADE WIDTH

The width across the tooth form of the blade.

BLADE THICKNESS

The actual thickness of the blade material.

CUT THICKNESS

The distance across the tooth form. This can be greater than the blade thickness if there is a set on the teeth.

TOOTH SET

The difference between the blade and cut thicknesses. Tooth set allows for efficient bone debridement during cutting.

TOOTH PITCH

The distance between teeth on the cutting face. A smaller tooth pitch will produce a finer cut, a larger pitch will produce a coarser cut.

Tooth Formations

STANDARD

Conventional tooth formation for less aggressive cuts

OPPOSED

Teeth pointing in opposite directions improves blade stability

WEBLITE

Recessed blade surface, without tooth offset improves debris removal and reduces skiving

TWIN TOOTH

Twin tooth formation combined with debris removal channels ensures precise cuts

PRISMATIC

Prism shaped tooth formation gives knife edge sharpness for greater cutting efficiency

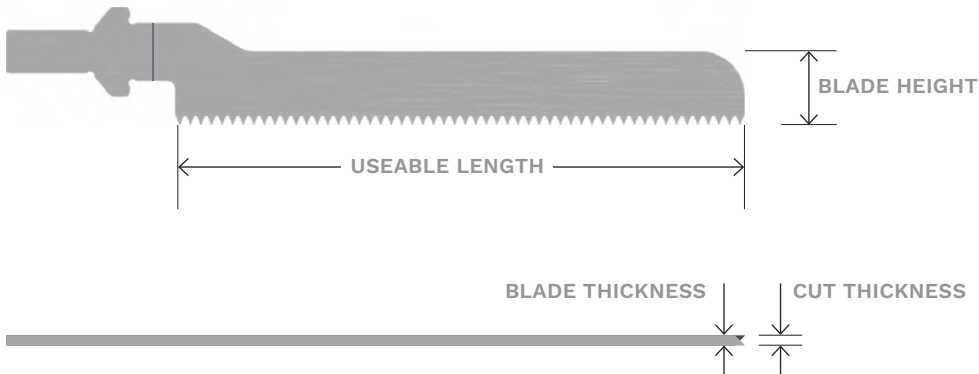

ULTRACUT

Zero offset prismatic tooth formation, combined with debris removal channels produces optimal cutting performance

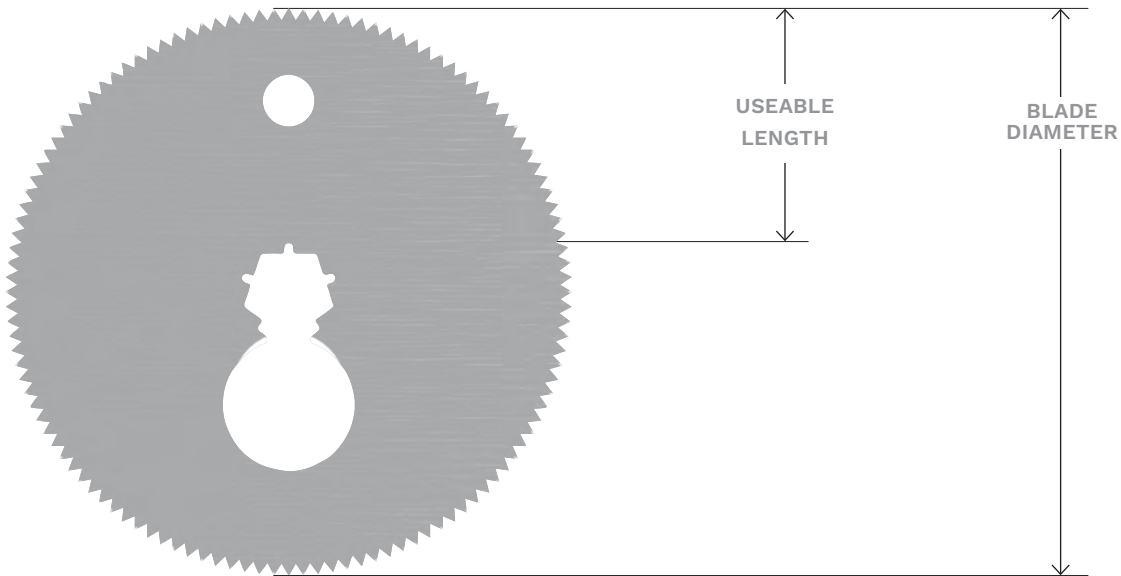

Glossary

Reciprocating & Sternum Blades

BLADE HEIGHT
The difference between the top of the blade and the tip of the teeth

USEABLE LENGTH
The length of the tooth form

USEABLE LENGTH
The maximum depth of cut possible

BLADE DIAMETER
The total width of the blade

Catalogue Usage Guide

This catalogue is designed to help you find the blade you're after as quickly as possible. Divided into coloured sections according to the compatible manufacturer of the tool they fit, the blades are organised in numerical order within these sections.

Data Sections

At the beginning of each section is an introductory sheet showing the blade hubs featured within so you can easily find what you are looking for, as well as the tool type being listed alongside.

Within each manufacturer section the blades are arranged by number so each range is grouped together. This helps you to find the right blade quickly and alternative or additional blades for your tools easily.

The diagrams are actual size to aid with finding the right blade.

Reference

If you've got a reference number from another manufacturer, please consult our cross reference charts at the back of the catalogue. This will tell you our compatible part number.

Terms & Conditions of Sale

1. All cutting accessories in this catalogue manufactured by us are guaranteed for single use, unless otherwise specified, from the date of purchase from us or our agents against defective workmanship and materials, and goods proved to be defective during this period in these respects will be replaced or repaired free of charge.

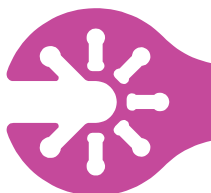

In the case of goods merely supplied by but not manufactured by us we merely pass on the benefit of any guarantees, conditions, and warranties received by us in respect of such goods.

None of the previous statements in this paragraph affect customers statutory rights and such statements are in addition to such rights.

2. Every effort will be made to keep to the delivery dates, but no liability can be accepted for loss caused through delay for reasons beyond our control or by industrial dispute of any kind (whether involving any of our employees or not) or by any failure to obtain materials goods or equipment from a supplier through no fault of our own in due time to observe delivery dates. The right is reserved to suspend delivery as long as any payment for goods previously invoiced is in arrears.
3. In view of the fluctuations, raw material costs, etc., the prices quoted are subject to alteration without prior notice. Goods will be invoiced at prices ruling at date of despatch notwithstanding any quotation or prior acceptance of order.
4. Payment should be made in full within 30 days of invoice date unless other arrangements are settled.
5. All goods will remain our property until such time that the full invoice value has been paid.
6. Minimum order value is £50.00 or EUR 80.
7. Equipment may not be returned to us for credit without obtaining our prior written authorisation. All returned goods will be subject to a re-stocking charge.
8. All goods shall at all times be at buyers risk.
9. Post, carriage and packing will be charged extra in accordance with our published scale.
10. **Prices do not include V.A.T.** which will be charged extra as appropriate.
11. The applicable law shall be the law of England.
12. Whilst every reasonable care is taken to ensure that our products are safe, you are requested to pay particular attention to applying the proper health and safety precautions in the use of our products and where instruction manuals are issued, that the instructions therein are scrupulously observed.
13. The above terms and conditions shall apply notwithstanding customers terms and conditions and anything which may be stated or implied to the contrary in correspondence or other conditions.
14. Claims for shortages must be submitted in writing within 10 days from receipt of goods.
15. Goods returned for credit with seller's prior agreement will be subject to a standard re-stocking charge of 15% of the net invoiced value.
